SUMMARY

I'm a full stack developer. I have a strong command over both front-end and back-end technologies, allowing me to build complete and scalable applications. On the front-end side, I specialize in HTML, CSS, and JavaScript frameworks such as React. I'm passionate about creating intuitive user interfaces that provide an exceptional user experience. I pay great attention to detail, ensuring that the websites or applications I develop are responsive, visually appealing, and accessible across different devices and browsers. Moving to the back end, I'm proficient in server-side languages like c, Java. I have extensive experience working with databases such as MySQL and I can design efficient database structures and write optimized queries. I'm familiar with RESTful APIs and know how to integrate them into applications to enable seamless communication between the front end and back end.

EDUCATION

B.E ComputerEngineering

SKN-Sinhgad Institute of Technology and Science, Lonavala (Affiliate with Savitribai Phule Pune University)

Passing year = 2023

PROJECT

Big Mart Sales Prediction System
• Created Web app based on Machine Learning Algorithm which can predict the number sales in Big Mart
• HTML and CSS were used to create Front end of web application.

Weather App
• Weather app written in HTML, CSS, and JavaScript using the APIs for fetching weather and geolocation Information. HTML, CSS, JavaScript and APIs were used to create the application.

TECHNICAL SKILLS

Language: Html, CSS, Bootstrap, Java script, Reactjs, Core Java, C
Database Management: MySQL.
Productivity Tools: Vs studio code, Eclipse

SOFT SKILLS

1. Communication
2. Time Management
3. Problem Solving
4. Adaptability
5. Teamwork
6. Leadership

LANGUAGES

1. English
2. Marathi
3. Hindi
